

Download Manager V1.1 Release Notes

New Features and Changes

- Updated default startup size of UI to fit smaller desktop screens
- Updated CSV handling to allow import of files containing variable number of columns and be flexible on recognizing more column names:
 - URL/downloadURL (required)
 - Title
 - OrderNum
 - DataSet
 - FileFormat/Format
 - Extents
 - BoundingBox
 - Thumbnail

See the user guide for more information on these new features and changes.

Bug Fixes

The following items have been fixed and are contained in this release.

- Updated handling of Banner image which was preventing the application from running on new configurations that did not have an existing config.properties file.
